

Dr. Anita Joshi, Founder of Dr. Anita's BioConsultancy, is a Pune based Biotechnologist and an Independent Consultant since the year 2000. Dr. Joshi completed her Ph. D in Biotechnology from the National Institute of Virology (NIV) in Pune (where she worked on a viral vaccine and diagnostics development). Following which she taught at the Pune University for 2 years.

Thereafter, since the year 2000, she has worked as an independent consultant providing strategic solutions to more than 175+ reputed Biopharma/ medical device organizations such as Thermo Fisher Scientific, Merck,

Advanced Enzymes, Span Diagnostics and many more, in several key areas such as Research and Development of new products, Product development, Quality Assurance , Quality Control, and currently in Regulatory affairs as well. These assignments have been for Indian companies, multi-nationals and also include many international assignments. She has provided end- to- end solutions including establishing collaboration, protocol designing, budgeting and negotiations, execution of project, management and monitoring of evaluation, analysis and interpretation of data. The work has resulted in 42 publications.

She is a certified Auditor and has completed more than 350+ audits with certification bodies like BSI (British Stds Institution) including International audits. Currently she is a trainer with BSI and TUV and does internal audits for US companies.
